(TESTED.)

MO. BOT. GARDEN
1911

L. L. MAY & CO.,

SEED GROWERS,

St. Paul, Minnesota.

Presented to the L. H. Bailey Hortorium
by the Missouri Botanical Garden, 1972.

TO THE MARKET GARDENERS.

In the following pages we list all the standard varieties of vegetables and such new sorts as we have found by careful test to be worthy of a place in our *Market Gardeners' Catalogue*.

NORTHERN GROWN TESTED SEEDS.

Every year demonstrates the fact more clearly that *Northern Grown Seeds* are superior to all others, being earlier, hardier and more productive. They are now acknowledged by all growers to be the best seeds for any section. Our business has increased over 500 per cent. in the past three years. This is the best proof that can be given as to the popularity of *Northern Grown Stocks*.

OUR PRICES. We have endeavored to make our prices as low as possible, considering the grade and class of seeds which we supply. **Cheap Seeds are Dear at any Price**, as they never give satisfaction, and frequently cause a heavy loss to the purchaser on account of a poor crop.

OUR STOCKS. Our Seed is grown from the most carefully selected Stocks, by our growers, whom we have employed year after year, and whose experience and honesty is unquestionable. We are well aware of the fact that we cannot compete in prices with a certain class of so-called *Seedsmen* who buy their seeds in the open market, and who care nothing about the quality. **We aim to make Highest Quality** our first consideration, and then prices as low as possible considering the class of goods we handle. Another decided advantage we possess over any other seed house in the Northwest, is the fact that all our seeds are thoroughly **Tested** in our Green-houses before an ounce of it is offered, therefore, our patrons can be sure of getting first-class seed in every particular.

ONION SEED—OUR SPECIALTY.

That we are headquarters for **Onion Seed** of the highest germinating quality is thoroughly demonstrated by the fact that our *Market Gardeners' trade* has trebled in the last two years. We have a carefully selected stock of the two most popular and profitable varieties, **Red Wethersfield** and **Yellow Globe Danvers**. We have been particularly careful in the selection of this seed from Onions of the largest size and truest type only. In quality this seed is the finest offered, and we *guarantee* it to be of 1891 growth and *thoroughly tested*. Read what Mr. T. Greiner says in his Essay on **How to Grow Onions**: "With Onions, more than any other vegetable, Cauliflower excepted, the outcome depends largely upon the seed. Good seed only can bring a glad harvest. It should be obtained from a reliable grower or dealer, for there is always a large stock of poor, worse than worthless seed in the market. *Cheapness in Onion Seed carries with it a suspicion of inferiority.* The grower can ill afford to run risks for the sake of saving a few dollars when he has hundreds at stake in his prospective Onion crop. By all means go sure, pay a good price and plant good seed."

PREMIUMS. On all orders amounting to Five Dollars and upward we give premiums in seeds as follows:

For \$ 5 order, seeds to amount of	\$0.50
For 15 " " " "	1.50
For 25 " " " "	2.50

For \$10 order, seeds to amount of	\$1.00
For 20 " " " "	2.00
This applies to Cash orders only.	

MARKET GARDENERS' LIST.

(JANUARY, 1892.)

While we exercise the greatest care to have all Seeds pure and reliable, we do not give any warranty, expressed or implied.—If the purchaser does not accept the Seeds on these conditions, they must be returned at once.

**DWARF TREE OR BUSH TOMATO.**

This is a variety for the market gardener and the finest we have ever seen. Its great advantage lies in the fact that the bushes are **self supporting**, and, even when laden with fruit, requires no support at all. Another point that will make it very valuable for the grower of tomatoes for market purposes is its **earliness**. No variety we are acquainted with can surpass it in this respect. The fruit is of good size, a scarlet color and wonderfully fine flavor. Its appearance always attracts attention, and we think it will take the place of the Acme and others that are now being grown for the market.

Pkt. 20c.; 3 pkts. 50c.; oz. 75c.

20

SULTAN ONION.

The best Yellow Globe Onion that can be grown. It becomes the most popular Onion for general cultivation as soon as thoroughly tested by the growers. It is of bright yellow color, and grows to a uniform size; the size and keeping qualities, combined with its productiveness and size, are certain to make it the leading Onion among growers. No one who raises onions should overlook this new variety.

Pkt. 15c.; oz. 40c.; $\frac{1}{4}$ lb. \$1.35; lb. \$4.50.

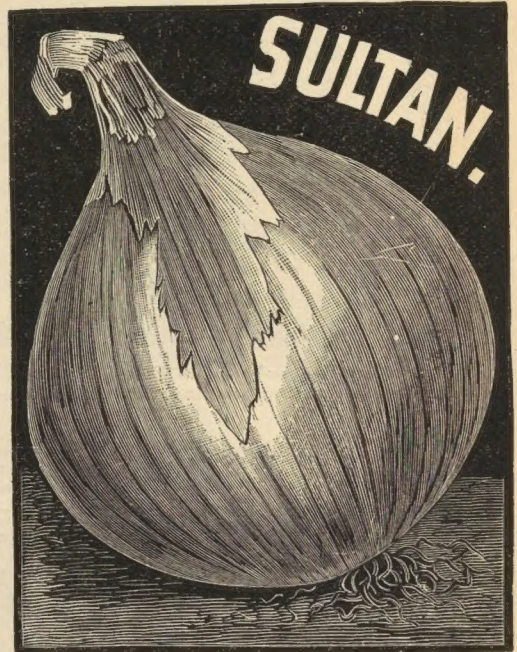

ICE KING WATERMELON.

The Melon for All Sections.

See Colored Plate in Retail Catalogue.

We are pleased to be able to offer our market gardeners this season a melon that is worthy of their attention and one that is bound to become the most popular variety ever introduced. It is the best melon that can be raised for shipping, surpassing the well known Kolb for this purpose, and is far superior to that variety in quality and productiveness. The meat is of a bright color, very rich and sweet. We have carefully selected the Ice King by the side of all our other melons and have found none that can equal it in flavor or yield. We heartily recommend this melon for both private and market use.

Pkt. 10c.; oz. 35c.; $\frac{1}{4}$ lb. \$1.25; 1 lb. \$4.00.

10

YELLOW QUEEN LETTUCE.

This is an entirely new and distinct variety which originated in Germany. It forms large solid heads of a yellowish green color, and stands the heat during the hot summer months better than any variety we have ever grown. On our colored plate is a good representation of this beautiful lettuce. It is by far the best variety for summer use that has ever been introduced. The delicate color of the leaves and fine quality make it a favorite wherever tested. Nearly every plant makes a fine large head, even in the hottest weather, when other varieties fail to grow. We cannot too highly recommend the Yellow Queen to all our friends.

Pkt. 10c.; oz. 50c.

MARKET GARDENER LETTUCE.

This year we have a splendid stock, and shall be able to offer it somewhat lower than we did last season, and are in a position to fill all orders, as we saved a nice lot of the seed. Our "Market Gardener" is a variety that is unusual for size and solidity of head, and it shows but little tendency to run to seed. We have had plants time and again of this variety eighteen inches in diameter, which weighed nearly four pounds, with heads almost as solid as an early summer cabbage, which in general form it somewhat resembles. The variety blanches itself naturally, is crisp, tender, and of excellent flavor, and always free from bitterness. The outside color we consider to be distinct in shade from any other lettuce that we are familiar with, and may be described as a clear, deep apple green, while on the inside the color is a yellowish white. No variety ever introduced has attracted so much attention among gardeners who grow lettuce for the early market.

Pkt. 10c.; oz. 20c.; $\frac{1}{4}$ lb. 45c.; lb. \$1.75.

ARTICLES

PRICE

NEW YORK LETTUCE. ✓

An entirely new and distinct variety which has attracted considerable attention among the largest growers of lettuce. The leaves are very tender, and of a beautiful apple green color, shading to a light green or delicate yellow at the edges. It grows to an immense size, many of the heads measuring over fifteen inches in diameter and weighing between three and four pounds. The flavor is simply delicious, resembling that of the Yellow Queen. Not good for forcing, but is one of the best that can be grown for summer use. We would recommend our market gardeners to use our celebrated Market Gardener Lettuce for forcing purposes and the Yellow Queen and New York for summer use. This will give them the finest varieties that can be grown.

Pkt. 10c.; oz. 25c.; $\frac{1}{4}$ lb. 75c.; lb. \$2.50.

STONE TOMATO. ✓

The introducer thus describes it: "The New Stone Tomato ripens for main crop; is very large and of bright scarlet color; very smooth, with occasionally a specimen very slightly octagon shaped; ripening evenly to the stem without a crack; exceedingly solid and firm fleshed (as its name indicates;) is an excellent shipper; quality the very best; fine for canning; a good keeper; without hard core; not subject to rot; its appearance on market remarkably attractive; a heavy variety; its vines and foliage rank and robust, heavily loaded with very uniform specimens of fruit." This splendid Tomato was offered for the first time last season and has certainly proved to be all the introducer claimed for it, and we take pleasure in recommending it to our patrons.

Pkt. 20c.; oz. 40c.

TRUE BLUE PEA.

Since our introduction of this valuable new Pea we have received many testimonials in regard to its fine flavor, earliness and productiveness. It is by far the finest Blue Pea ever offered, surpassing any we have ever seen in yield and quality. It grows to about the same height of our North-west Premier and produces a profusion of medium sized pods, which are well filled with beautiful blue peas of the most delicious flavor. The lovely appearance of the True Blue Pea when shelled has placed it in the front rank among the large growers for market purposes, as it always brings a high price.

Pkt 10c.; pt. 20c.; qt. 40c.; pk. \$1.75; bus. \$6.50.

NORTH-WEST PREMIER PEA.**The Earliest, Finest Flavored and Most Productive Variety in Cultivation.**

This is by far the earliest Pea in cultivation, and is entirely distinct and superior to any other. We have carefully tested it each season on our trial grounds and it still retains first place, both for earliness and productiveness. It ripens so evenly that frequently the entire crop may be gathered at one picking. It seldom attains a height of over twenty-four inches, and requires no stakes or boards for support. Coming into bearing so early, the North-west Premier always commands the very highest price in the market. This makes it invaluable to those who grow peas for the market. Year after year we have been carefully selecting and improving this extra early pea, and the demand for it this last season was simply wonderful. We have sold several thousand bushels of the North-west Premier since its introduction, and the many testimonials we have received from all sections go to show that it is all we claim.

Pkt. 10c.; pt. 15c.; qt. 25c.; pk. \$1.10; bu. \$4.00.
--

**MARKET GARDENER BEET.**

Several years ago we introduced this splendid turnip-shaped beet, and its earliness and extra fine quality at once placed it at the head of the list of beets for the market gardener. It is by far the earliest variety in cultivation and the best forcing beet ever offered. The tops are small, neat and of uniform growth. The roots are a beautiful, deep, rich red color, always attracting attention wherever exhibited. Flesh is firm, tender and very sweet, retaining its dark red color after being cooked. Trials have been made each season, on our grounds, of all the new blood turnip beets offered by different firms, and so far our "Market Gardener" leads them all in flavor and earliness. **Don't fail to try it this season.**

Pkt. 10c.; oz. 20c.

ERFURT PRIZE BEET.

See Colored Plate in Retail Catalogue.

This and our May's Market Gardener are by far the best beets that can be grown for market purposes. The Erfurt Prize is a half long beet of a deep red color, very sweet and fine flesh. It is a new variety which we have procured from one of the largest seed growers in Europe, Mr. Ernst Benary, Erfurt, Germany, and we offer it for the first time to our patrons this season. Not only is it one of the finest appearing beets we have ever seen, but its keeping qualities are unequalled. No market gardener can afford to be without this valuable new variety.

Pkt. 10c.; oz. 25c.

At Prices Quoted in this List, Seeds are sent by Express or Freight at Purchaser's Expense.

Half a pound at pound rates; half peck at peck rates; half bushel supplied at bushel rates.

NOTICE. When Vegetable Seeds are wanted by mail in quantities of one-half pound and upward, postage must be added to the prices quoted in this list, at the rate of 8c. per lb. Postage on Peas and Beans, please add 15c. per qt., and on Corn 10c. per qt., to prices given.

While we exercise the greatest care to have all Seeds pure and reliable, we do not give any warranty, expressed or implied. If the purchaser does not accept the Seeds on these conditions, they must be returned at once.

PLANTS, BULBS, ETC.

We allow one-third off from catalogue prices on all Bulbs, Plants, Etc., and would call your attention to our fine list of Vegetable Plants, such as Tomato, Cabbage and Lettuce.

See Retail Catalogue for prices on Seeds by the packet.

QUEEN OF THE MARKET RADISH.

This new Radish was introduced by us last year, and is certainly the most valuable variety that has been offered for some time. Its rapid growth and beautiful appearance have given it the leading place with our market gardeners. For forcing in hot beds or sowing in the open ground in early spring, there is no red turnip-shaped radish that can equal it. In flavor it is mild, crisp, juicy and tender. *Its points of superiority are the wonderfully small tops, rapid growth, splendid shape and extra fine quality.* Another valuable point is that it shows no disposition to become pithy, but on the contrary solid and juicy a long time after it has fully matured. Owing to its handsome appearance, the Queen of the Market always commands the highest price in the market. It will pay you to grow this variety this season.

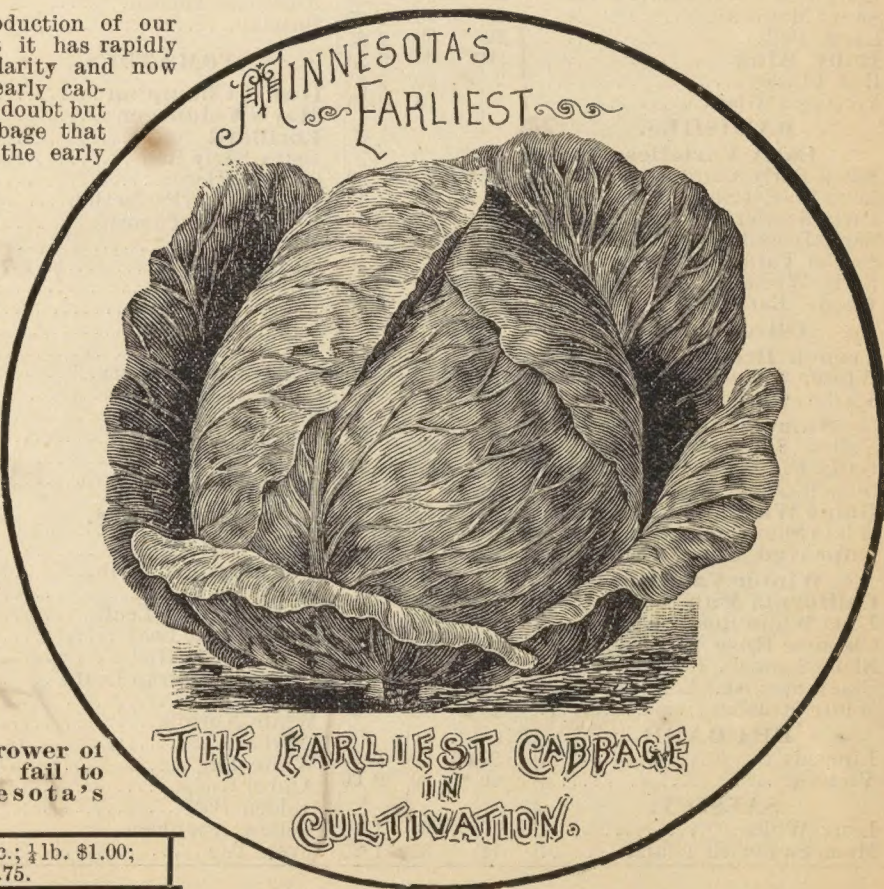

Pkt. 10c.; oz. 20c.; $\frac{1}{4}$ lb. 45c.; lb. \$1.50.

MINNESOTA'S EARLIEST CABBAGE.

The Most Profitable Variety in Cultivation.

Since the introduction of our Minnesota Earliest it has rapidly advanced in popularity and now heads the list of early cabbages. There is no doubt but it is the finest Cabbage that can be grown for the early market, as it comes into bearing over two weeks ahead of the Jersey Wakefield and Extra Early Etampes. These well-known varieties have long been considered the first of all, but Minnesota's Earliest is considerably earlier. The heads are oblong, conical shaped, very solid and firm. It has very few outside leaves, and every plant forms a fine head. We do not know of any vegetable that has created such a sensation among the market gardeners in all sections of the country. No grower of cabbages should fail to try the Minnesota's Earliest.

Pkt. 10c.; oz. 35c.; $\frac{1}{4}$ lb. \$1.00;
lb. \$3.75.
